

# Grip-Gard® BC Basecoat

## Grip-Gard BC Translucent Coatings

Grip-Gard BC Translucent Binder provides the ability to convert the Grip-Gard BC toners into a fast drying, durable backlit sign coating.

By using the same toners as in the Grip-Gard BC system, you now have the advantage of having an additional product line while carrying just one set of toners.

Grip-Gard BC Translucent Coatings are easy to spray with the superior color consistency needed to produce a smooth backlit sign with an excellent appearance.

As part of the Grip-Gard BC intermix system, a sign shop is able to mix and match thousands of colors including Pantone® and 3M™ vinyl standards plus thousands of corporate program colors. Grip-Gard BC Translucent offers the widest color spectrum in the industry.

Grip-Gard BC Translucent adheres to most plastic substrates including acrylic, polycarbonate, ABS and most flexible vinyl.

And as with all AkzoNobel products, you can count on Grip-Gard BC Translucent Coatings to be the quality leader in the market.

### Issue

### AkzoNobel Solution

- Translucent coatings often require a unique assortment of toners, adding to inventory costs.
  - Translucent coatings are often grainy and frequently have blotchy appearances.
  - Production bottlenecks are caused by application inconsistencies due to difficult application properties.
- Grip-Gard BC Translucent utilizes the same set of Grip-Gard BC toners used in your other sign applications.
  - Grip-Gard BC Translucent is easy to spray and has better color strength consistency giving a smoother, more even appearance.
  - With its excellent wetting properties and quick dry times, Grip-Gard BC Translucent is both easy and fast.
